

MS Copilot 365 - Introduction level (with hands on)

This virtual one-day workshop, delivered via Microsoft Teams, provides delegates with a comprehensive explanation to Microsoft 365 Copilot. The session explains how Copilot is fully integrated across the Microsoft 365 suite and demonstrates how it enhances productivity through improved content creation and data analysis. Delegates practice with practical exercises across Teams, Word, Outlook, Excel, OneDrive and PowerPoint. Delegates need to have a pro licence.

The workshop is recorded and made available to participants for 30 days. It accommodates up to 10 delegates. Delegates also receive complimentary one-month access to a Bite Size online learning membership, which includes an online Copilot course, assessment, and interactive game as well as 2 AI Personal Development courses on A Managers guide to AI and Demystifying AI.

By the end of this course, participants will be able to:

- Describe the four main versions of Microsoft Copilot and understand the differences between Work and Web options.
- Confidently use Copilot within the commonly used Apps.
- Create Prompts that can be saved and re-used.
